

Your Invitation

You are invited to attend Mastenbroek's soil and water management demonstration day on 31st May

Mastenbroek have worked with Trimble for many decades, establishing Mastenbroek drainage trenchers with Trimble machine control as the industry standard to survey, design, install and map land drainage schemes.

On 31st May we will demonstrate how Trimble's Field Level II system enables growers to:

- Reduce ponding
- Reduce soil erosion
- Produce more consistent yields across the field
- Maximise irrigation efficiency
- Optimise crop uptake of nutrients

We will demonstrate how Trimble's WM-Form topographic data analysis and design software enables you to:

- Re-form fields to centimetre accuracy
- Conserve the thin layer of top soil which contains the precious organic matter and nutrients
- Conduct a detailed field survey and design, integrating land levelling solutions with existing or proposed land drainage schemes

WHAT

- See land forming in action with a tractor pulled scraper working to a pre-surveyed and designed scheme
- Presentations and practical demonstrations of the Trimble software
- Factory guided tours of the Mastenbroek drainage trencher production

WHEN

- Thursday 31st May from 10:00 to 16:00

WHERE

- Mastenbroek Ltd, 83 Swineshead Road, Wyberton Fen, Boston, Lincs, PE21 7JG

PLAN TO ATTEND?

- Please email sales@mastenbroek.com or telephone 01205 311313 to confirm numbers to help us feed you on the day
